

Project Title: Embassy of Safety

Hosted By: World Design Embassies

Project Introduction:

In the Embassy of Safety we look at how designers can contribute to current safety issues. This embassy concentrates on research and experimentation and attempts to answer the question 'Is safety a right?' by generating practical solutions from multiple perspectives.

About Organisation:

World Design Embassies is a programme in which design is used to develop new perspectives and tangible solutions for social challenges. At World Design Embassies we take a human-centred approach to developing visions, products and services to meet current and future needs. We do this by bringing together issues such as health, safety, mobility, sustainable products and services, building and living, technology, urgent issues related to water, climate change and food in embassies for the future. WDE is a year-round programme organised by Dutch Design Foundation and partners and culminates with exhibitions and events during Dutch Design Week.
